

## TIRE CARE CHANGES

With vehicle fuel economy standards increasing, manufactures are making cars lighter and lighter. This includes the steering and suspension components that keep your vehicle in proper alignment. In many cases alignments are recommended on an interval basis. Knowing that tire manufactures require records for tire care we document all of your maintenance.

## TIRE POLICIES

# TIRE CARE

What? Why? How often?

## ROTATION AND BALANCE

---

### Rotation

We perform tire rotations on a 5k mile interval to provide you with the longest tire life. All "Wrigley's" tires are rotated as needed, free of charge and include basic brake and steering inspections

### Rotation and Balance

Rotation and balance services are performed every 15k miles as per tire manufacture requirement. This is a main determiner of tire life and is required for treadwear warranty.

### Alignment

Wheel alignments are recommended on an interval basis, much like rotation and balance services. A poorly aligned vehicle will wear out tires more rapidly, costing you money in the long run. We perform alignment checks at 20k mile intervals.

### Tire Repair

In the event there is an injury to a Wrigley's tire, we have you covered. Tire repairs are covered under your Tire Protection Plan.

### Tire Protection Plan

At Wrigley's we provide a Tire Protection Plan that you know you can trust for the life of the tire. If your tire suffers a non-repairable injury, we have you covered.

## TREADWEAR WARRANTY

---

Tire manufacture treadwear warranties require regular care to maintain the treadwear warranty. If your tire does wear out prematurely, and has been properly maintained, we do the leg work to make sure you get the credit you deserve.
